

Enterprise Asset Management as a service

Cloud is the enabler that allows businesses to interact with the asset management ecosystem from any location, at any time, on any device.

The Challenge

Cloud-first is a widely adopted business strategy, driven by the need for improved security, scalability, business continuity and cost efficiencies. Moving enterprise applications, like Maximo, into a data centre might be considered a step in the right direction, but lacks many of the desired benefits:

- The majority of infrastructure and application support tasks remain the organisation's responsibility
- Upgrades remain a resource intensive activity, leading to version lock

How Clarita can help

Enterprise Asset Management as a Service (EAMaaS) is a comprehensive solution for managing physical assets on a common platform. With Maximo, you can maintain all asset types, check their health in real time and streamline global operations, from procurement to contract management.

ASSET MANAGEMENT EXPERTISE

Leverage the team that brings technical skills and real-world experience together. Our people are Maximo, mobility and GIS experts.

HOLISTIC BUSINESS SOLUTION

EAMaaS is a complete managed service provided by industry experts. We offer an easy migration path & outcome led methodology.

FULLY MANAGED TECHNOLOGY

Clarita provides an all-inclusive SaaS platform combining EAM, mobility and digital engineering in one monthly subscription.

EAMaaS Inclusions:

- Continuously upgraded solution
- 24x7 Proactive System Monitoring
- 24x7 Support
- 99.99% production availability
- Flexible Licensing options
- Security – ISO27001 certified
- Backup & DR Services
- System integration services
- Various mobility options
- Secure 3rd party reporting access

Outcomes

By combining a SaaS EAM platform with the asset management expertise necessary to align technology with business needs, EAMaaS delivers:

- Faster time to value
- Peace of mind
- Future proofed asset management information systems
