IBM MAS
READINESS ASSESSMENT

An assessment to prepare and advise you on your migration to IBM MAS

IBM Maximo Application Suite (IBM MAS) was launched as version 8.0 of IBM's market leading enterprise asset management software platform in July 2021. With end of support for version 7.6.1.x looming, now is the time for savvy system owners to start planning their migration strategy.

Working with an experienced and trusted partner, upgrading to IBM MAS need not be a traumatic experience. But like any major project, it pays to go in with your eyes wide open.

To support our clients in addressing the opportunity for IBM MAS, we begin with an **IBM MAS Readiness Assessment**.
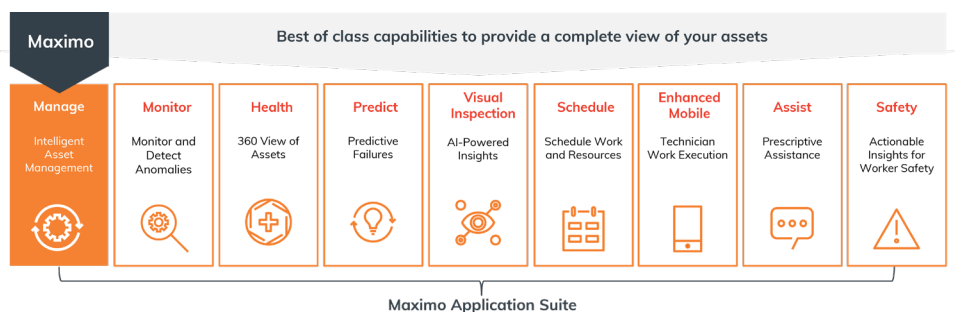

ORGANISATIONAL CHALLENGES

- The need to increase productivity to meet customer demands while having 0 downtime and 0 defects
- Growing (or centralising) IoT footprint
- Improving efficiency and speed of maintenance inspections of large infrastructure assets
- The ability to identify and classify defects or anomalies beyond simple human analysis.

BENEFITS OF IBM MAS:

- **Simplified licensing**
  Providing one license entitlement to access the entire IBM Maximo portfolio in a model that is simpler to scale and administer.

- **Enriched functionality**
  The extended application suite offers functionality to take customers on a maturity journey, including asset performance management and AI assisted inspection and predictive analytics.

- **Integrated platform**
  IBM MAS is built to run on Red Hat OpenShift Container Platform for optimised scale and availability on on-premises, private and public clouds, or hybrid environments.

Access the entire suite with simplified Licensing and Usage model built around **AppPoints.**

IBM MAS is now up to release 8.11 and is the first version to enter Long Term Support.

What are AppPoints?

A unit of measure with a common value by which IBM MAS can be licensed.

Businesses can access the entire IBM MAS Suite with one single entitlement. Users in the organisation will have a pool of AppPoints that will allow them to seamlessly move from one application to another, as needed.

Maximo	Best of class capabilities to provide a complete view of your assets							
Manage	**Monitor**	**Health**	**Predict**	**Visual Inspection**	**Schedule**	**Enhanced Mobile**	**Assist**	**Safety**
Intelligent Asset Management	Monitor and Detect Anomalies	360 View of Assets	Predictive Failures	AI-Powered Insights	Schedule Work and Resources	Technician Work Execution	Prescriptive Assistance	Actionable Insights for Worker Safety

Maximo Application Suite

IBM MAS READINESS &
AppPoint ASSESSMENTS

COSOL is in the unique position of being able to advise and assist with the technical, functionality and licensing challenges and opportunities that IBM Maximo Application Suite presents.

Customers can opt for a full IBM MAS Readiness Assessment or just an AppPoint Assessment.

- **IBM MAS Readiness Assessment** covers both the Functional Assessment, Technical Assessment and AppPoint Assessment.

- **AppPoint Assessment:** License Analysis and AppPoint adoption recommendations.

LICENSE ANALYSIS

- Review existing IBM Maximo Licensing
- Review current IBM Maximo version for missing critical patches
- AppPoint conversion analysis
- Opportunities for license optimisation.

FUNCTIONAL ASSESSMENT

- Run volumetric and usage assessment measures
- Inspect base configurations
- Check all applications and prepare observations.

TECHNICAL ASSESSMENT

- Perform technical review of IBM Maximo configurations
- Identify opportunities to migrate customisations to configurations
- Assess application usability and performance.

CERTIFIED PARTNER:

COSOL is an IBM Gold Business Partner, certified in Asset & Operations. Our IBM EAM Systems Practice team have been implementing IBM Maximo globally across major industries for over 15 years.
