ENTERPRISE ASSET MANAGEMENT AS A SERVICE

Enterprise Asset Management as a Service (EAMaaS) is a complete managed solution designed to establish and expand your asset management capabilities.
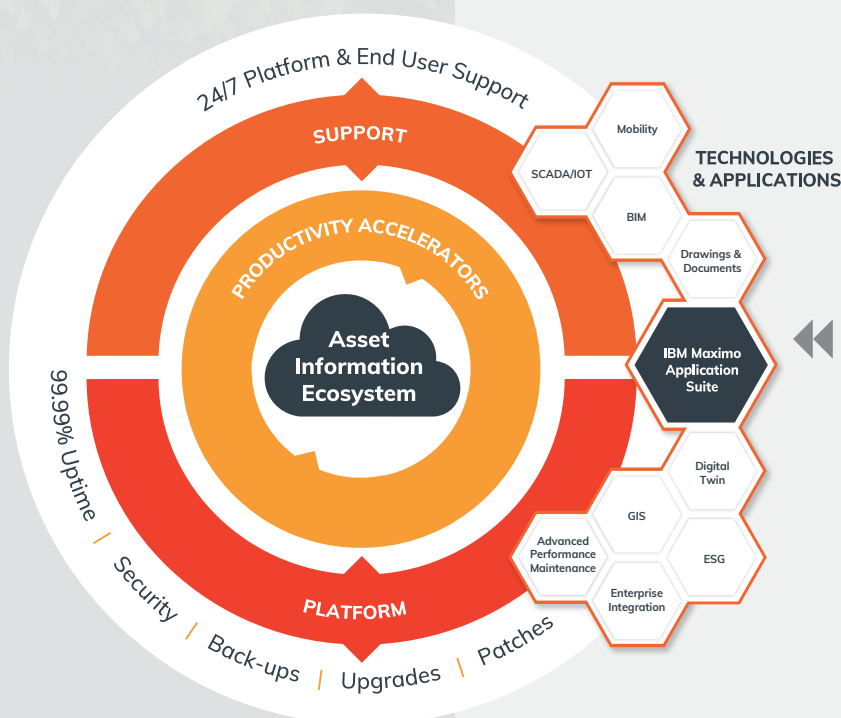

With the future of asset management set to become increasingly sophisticated and integrated with vast amounts of data and digital technologies such as AI, IoT, ML, and data visualisation tools, organisations need to establish strong digital foundations to enable them to remain sustainable and competitive.

Our EAMaaS solution provides those strong foundations by combining the market leading EAM software - IBM Maximo Application Suite, with a secure private cloud platform, application managed support and best practice expertise to deliver you a fully managed asset information ecosystem service.

With our Software as a Service model, we take responsibility for all technical design and essential system maintenace including software patching, back-ups and cyber security to deliver you a scalable, 99.99% high availablility and high performance EAM application.

Once established and operational, EAMaaS provides your organisation the platform to mature your asset management maintenance operations and support your asset management digital strategy.

THE ALL-INCLUSIVE MANAGED SOLUTION FOR YOUR EAM:

EAMaaS provides a single, integrated cloud-based managed solution.

Central to EAMaaS is the market-leading EAM - IBM Maximo Application Suite which has a comprehensive suite of tools for monitoring, managing, and maintaining assets using AI.

IBM MAS is modular for easy scalability, and already includes built-in features for:

- AI-powered predictive maintenance capabilities
- IoT integration for real-time asset monitoring
- Advanced analytics for performance optimisation
- Mobile support for field technicians

OUR **EAMaaS** SOLUTION

EAMaaS is not a templated service - it is a complete solution designed and configured by our experts to meet the specific needs of your organisation and establish the strong foundations needed to continuously improve your asset management capabilities.

KEY COMPONENTS OF EAMaaS:

PRODUCTIVITY ACCELERATORS
Pre-configured tools and processes to get you working quickly including extended asset health functionality for deeper insights.

PLATFORM
A fully managed 'as a Service' cloud platform with all the technical, design and essential system maintenance taken care of including backups, patching, updates and security.

SOFTWARE & INTEGRATIONS
IBM Maximo Application Suite and related third-party applications as part of your asset information ecosystem.

PLATFORM SUPPORT
Unlimited 24/7 platform support to report system bugs or issues with availability.

END-USER SUPPORT
ITIL-aligned, SLA-driven support for business-as-usual requests tailored to suit your needs.

With EAMaaS, organisations can become more resilient, efficient and sustainable. With your EAM taken care of, your teams can focus on their core competencies and managment of assets - not IT or admin.

Lower cost of entry | Reduced ongoing costs | Faster time to value

Ultimate Security | Reliability & Performance | 99.99% Availability

INCLUDED SOFTWARE:

EAMaaS is powered by:

IBM Maximo Application Suite

OPTIONAL INCLUSIONS:

- Esri ArcGIS
- FME Software
- EZMaxPlanner
- EZMaxMobile
- Nextspace Digital Twin Viewer
- RedEye DMS
- IBM MRO Inventory Optimization
- IBM Envizi Sustainability Suite

LEVERAGE OUR EXPERTISE

We are a global provider of asset management solutions for asset-intensive organisations that span across people, process, systems and data elements of the asset management framework to drive quantifiable business improvements.

We work collaboratively with clients from across the natural resources, energy and water, infrastructure, government and defence sectors to help them to achieve economic and sustainable improvements in their operations and supply chain.

We do this by utilising our signature solutions and proprietary software in combination with best-of-breed technologies and 23+ years industry, technical and functional expertise.
