

ASSET MANAGEMENT SERVICES

Expert support for when uptime, safety, and performance can't be compromised.

FROM STRATEGY TO EXECUTION, EXPERIENCE ADVICE YOU CAN RELY ON, AND PEOPLE YOU CAN DEPEND ON.

COSOL's Asset Management Services provides the expertise and support needed to keep operations running reliably - from boardroom strategy to boots-on-the-ground execution. We work with executives, asset managers, reliability engineers and frontline teams to improve performance, boost reliability, and drive safer, more efficient outcomes. When uptime, safety, and operational continuity matter most, we bring the insight, resources, and execution experience to deliver. And a partnership you can rely on.

HOW WE BRING REAL CUSTOMER OUTCOMES TO ASSET CENTRIC ORGANISATIONS

RELIABLE **ADVICE**

With COSOL, you can

- Unlock long-term value across the asset lifecycle
- Make smarter decisions with trusted data and insights
- Align operations with strategy using whole-of-life planning
- Maximise ROI from ERP and EAM investments
- Eliminate inefficiencies while strengthening compliance and audit readiness

RELIABLE **EXPERTS**

With COSOL, you can

- Mobilise the right people, faster when and where you need them
- Strengthen internal capability and operational resilience
- Improve execution quality and shutdown effectiveness
- Deliver projects faster, safer, and with less disruption
- Access 9,000+ AM professionals - trusted by 70+ organisations to scale without overhead

RELIABLE **DATA**

With COSOL, you can

- Improve asset and work management with clean, structured data
- Establish a trusted digital foundation for smarter decisions
- Support digital transformation with data you can depend on
- Enhance planning, scheduling, and supply chain efficiency
- Reduce maintenance and operational costs with high-integrity data.

RELIABLE **ASSETS**

With COSOL, you can

- Avoid costly delays, disruptions, and unplanned downtime
- Improve asset reliability, performance, and safety
- Reduce supply chain delays and inventory waste
- Lower ongoing maintenance and operational costs

FROM ADVICE TO EXECUTION

WE'VE GOT YOU COVERED

From strategy and advice to hands-on delivery, COSOL Asset Management Services helps fill critical capability gaps or manage the entire asset management lifecycle - efficiently, reliably, and at scale. No project is too small or too complex. If it impacts asset reliability, we're in.

OUR CORE MODULES

COSOL's Asset Management Services are built around two delivery streams: Advise and Operate and its supporting services shown below.

ADVISE

Strategic Asset Planning

Asset Management Learning Academy (AMLA)

Our AMaaS Bundles

Sometimes, a reliable end-to-end service is exactly what's needed, especially for critical tasks where internal capability is lacking, expertise is non-negotiable or risk needs to be minimised. COSOL's Asset management AMaaS bundled solutions take the stress out of complex delivery, so you can stay focused on performance.

OUR SUITES

Master Data as a Service (MDaaS)

Maintenance Scheduling as a Service (MSaaS)

Works Management as a Service (WMaaS)

Advanced Analytics as a Service (AAaaS)

Maintenance Planning as a Service (MPaaS)

Managed Services

LOOKING FOR DATA, PLATFORMS, OR AI-LED INSIGHTS?

That's where our Digital Asset Management team steps in, focused on data integrity, system optimisation, and advanced digital solutions.

WHY COSOL?

1. REAL-WORLD RESULTS, NOT JUST THEORY

We have over 25 years of experience delivering outcomes in asset-intensive environments. Our people have done the work - on site, in the field, and at the source - not just in PowerPoint. We scale with your needs, offering global delivery with local understanding. We don't serve every industry - just the ones that can't afford to get it wrong.

2. IT'S A PARTNERSHIP, NOT A TRANSACTION

Clients say COSOL feels like an extension of their own team: collaborative, dependable, and invested in the outcome. We work hard to live up to it day in and out. While others hand over a framework, we stay with you - diagnosing, supporting, and problem-solving side by side until the job is done.

3. RAPID FLEXIBLE SUPPORT THAT FITS YOUR REALITY

Whether it's short-term resourcing or long-term transformation, we mobilise quickly, communicate clearly, and adapt to what your operation needs - without red tape.

Did you know? We have one of Australia's largest specialist asset management resourcing teams, with over 9,000 professionals ready to support you - and we're trusted by 70+ clients across mining, utilities, and transport.

Project Snapshots

SAP TO PRONTO DATA CONVERSION FOR AERIS RESOURCES

Aeris acquired the Cracow mine in Queensland and chose to adopt Pronto as their ERP, migrating their existing operation. COSOL project managed the conversion and implemented practical changes to support a lean, results driven organisation.

BARRICK GOLD MINE INVENTORY REDUCTION

COSOL executed a program to rationalise inventory for Barrick gold in the Dominican Republic resulting in significant savings. This opportunity came after a project to review and update BOMs across the equipment fleets. The project resulted in \$10m in inventory savings over the following year.

GLENCORE FMECA MODELS & INSPECTION DOCUMENTS FOR MOBILE ASSETS

COSOL developed FMECA models and service sheets for mining equipment at Glencore's United mine. The project required a quick turnaround to develop the service sheets as assets entered operations. The result was a solid framework for continuous strategy improvement as the assets entered operation.

COAL SEAM GAS EXTRACTION STRATEGY FOR ANGLO COAL

Development and improvement of maintenance strategies for coal seam gas assets for a Bowen Basin Coal mine. The existing assets had reliability issues and strategies had not been updated. Updated strategies using a structured engineering approach ensured attention could be paid to problem areas to improve asset reliability and reduce overall maintenance.

ABOUT COSOL

COSOL is built on one belief: in asset-intensive industries, **reliability is everything.**

We're a trusted, data-led asset management partner - known for our deep expertise, dependable delivery, and ability to keep critical assets performing at their best.

With over 25 years of experience, we combine deep industry expertise, dependable delivery, and powerful digital capabilities - including AI, data, and proprietary software - to help our clients reduce downtime, improve performance, and optimise the full asset lifecycle with confidence.

From mining and energy to infrastructure, transport and government to defence, our clients trust us to work as part of their team - responsive, easy to work with, and focused on outcomes that matter.
