

OUR CORE SOLUTIONS

COSOL is built on one belief: in asset-intensive industries, reliability is everything.

Journey-based Solution Areas

Our capabilities are structured around three journey-based solution areas - each designed to help asset-intensive organisations drive performance, reduce risk, and make better decisions.

Asset Management Services

From strategy to execution - reliable support that keeps operations moving

Digital Asset Management

Reliable data. Smarter systems. Better Decisions.

Asset Management as a Service (AMaaS)

Always-on asset management - fully delivered, when performance can't slip.

COSOL Signature Solutions

Asset Management Services

From strategy to execution - reliable support that keeps operations moving

COSOL provides the reliable support you need to keep operations moving - from strategic planning to hands-on improvement. When performance, safety, and uptime are on the line, expert insight and dependable execution matter most. Managed Services

When **Reliability** Matters

These are the six ways we deliver it.

In asset-centric industries, reliability means everything - from asset uptime to system performance, from clean data to trusted advice. These six pillars define how COSOL shows up, delivers outcomes, and earns your trust.

1

Reliable ASSETS

We help you keep your assets running - longer, safer, and with less disruption.

With the right data, planning, and support in place, we help you avoid costly delays, stay compliant, and get more life from your critical assets. Because in your world, every minute offline means lost time, lost money, and lost opportunity.

2

Reliable PARTNERS

We're in it for the outcome, not just the engagement.

We become part of your team: dependable, invested, and focused on delivering results. Others hand over a report and walk away - we don't. We stay engaged, adapt when things change, and make sure it just keeps working.

3

Reliable EXPERTS

We don't just know asset management - we've lived it.

Our team brings real, hands-on experience in the sectors we serve. We've managed the systems, worked through the failures, and solved the problems. That's how we help you stay ahead of breakdowns, avoid rework, and get results you can count on.

4

Reliable ADVICE

Advice you can act on - and trust to deliver.

Our advice works because we've used it ourselves. Backed by operational experience, we give you clear, practical guidance to make smart calls under pressure - whether you need to reduce risk, cut waste, or make a case that stands up in front of the board.

5

Reliable DATA

Clean, consistent data you can count on.

We don't just digitise data - we fix it, structure it, and make it perform. We turn messy, incomplete asset data into a foundation you can trust, so you always know where the risk is - and what to do about it. When data is reliable, decisions are too.

6

Reliable TECHNOLOGY

Our technology isn't experimental - it's proven.

We deliver and manage technology that works - not in theory, but in the toughest asset environments. Our technology are built to scale, integrate, and perform under pressure. Because when your operations can't afford failure, you need technology that won't let you down.

Proven Performance. Global Trust

Trusted by asset-centric organisations across mining, utilities, transport, infrastructure, and government.

COSOL is built on one belief:

IN ASSET-INTENSIVE INDUSTRIES, RELIABILITY IS EVERYTHING.

We're a trusted, data-led asset management partner - known for our deep expertise, dependable delivery, and ability to keep critical assets performing at their best.
