

The Advanced and Predictive Analytics Platform for Transport

Consolidated, accurate and auditable insights that will unlock opportunity across your entire transport organisation.

Made with Transport, for Transport.

COSOL's Transport Advanced & AI Analytics Suite seamlessly, and continually, bring together data and extract meaning and predictive insights from multiple siloed sources across your transport organisation and serves as a single source of accurate and auditable truth. From operations to assets, sustainability to patronage, you'll have an accurate and complete view of your operations.

You can select only the modules you need, opt for a completely bespoke solution, or adopt one of our Decision Support Packages (The Maintainer, The Operator, The Business, and The Executive) that focus on common Jobs-To-Be-Done of each function and business goals.

The Modules

- Asset Lifecycle Management

- Work Order Analysis

- Test & Commission

- Operations

- Incident

- Patronage

- SIRI - Real-time data based on SIRI Protocol

- Passenger Experience

- Predict & Scenario Modelling

- Digital Twin

- Subcontractor Performance

- Service Payment Claims

- Finance Hub

- People Hub

- Predictive People Analytics

- Sustainability Suite

Decision Support Packages

The Operator

for operations, performance, customer experience managers & teams

The Executive

for executives and boards

The Maintainer

for asset managers & teams

The State

for government

The Business

for management

The Operator

The Operator is a decision support tool that helps transport operations managers and teams to improve passenger experiences, identify opportunities for operational improvement, and submit accurate and auditable reports for your service payment claims.

The Business

The Business is a decision support tool designed to empower transport business leaders with both macro and micro-level insights into their organisation, right at their fingertips. From finances to people, sustainability to operations, service payment claims to maintenance, those overseeing the business activities will have accurate and complete insights. By leveraging The Business, leaders can effectively minimise risk, reduce costs and fast-track their path towards achieving business goals.

The State

The State is a comprehensive decision support tool designed to provide transport authorities with critical insights into operations. Government bodies will have access to accurate and timely information to enhance oversight. By leveraging The State, transport leaders can improve service delivery, ensure compliance, optimise resource allocation, and drive better outcomes for both the organisation and the public they serve.

COSOL Transport Suite
The Advanced and Predictive Analytics Platform for Transport

The Executive

The Executive serves as a powerful decision support tool tailored for transport executives and board members, offering an executive overview of their organisation's activities. This tool facilitates swift, informed decision-making and enables confident communication with stakeholders. Integrated with The Operator, The Maintainer, and The Business decision support tools, its high-level dashboard offers bespoke reporting and real-time analytics aligned with the specific business objectives of your transport organisation.
