## COMPANY PRODUCTS AND SERVICES

COSOL's Toustone Intelligence team are data and predictive analytics experts for asset centric organisations. We seamlessly, and continually, bring together data and extract meaning and predictive insights from multiple siloed sources across your organisation. From operations to assets, maintenance to finance, our Asset Management Suite will provide you with an accurate and complete view of your organisation with its single, easy-to-consume dashboard, tailored to your business needs and asset management requirements.

Our Asset Management Suite allows you to select only the data modules you need, or opt for a completely bespoke solution. It's three categories include:

- Asset Performance & Maintenance
- Finance and Strategy
- Vendor & Workforce Performance.

We empower asset management professionals to swiftly identify incidents, opportunities and make confident, informed decisions in both asset management and business operations.

## KEY CUSTOMERS

Our advanced and predictive analytics platforms are designed to cater for asset-centric organisations in Natural Resources, Energy, Water, Infrastructure, Transport, Manufacturing and Government.

We work with organisations like:

**Transport Operators** like John Holland, Keolis Downer, MTR, Transdev, UGL, Downer.

**Government** like Sydney Metro, Yarra Trams, Metro Trains Sydney, Queensland Rail, Transport for Victoria, and Trans WA.

**Other Asset-Centric brands** like Mars, and Manildra.

## OUR TECH PARTNERS & PROVIDERS

## COMPANY CAPABILITIES AND DISCRIMINATORS

- We deliver one of Australia's most complex rail data, predictive analytics systems and reporting platforms. We integrate disjointed data silos into a single, accurate source of truth. Our Asset Management Suite, combines advanced analytics, business reporting via real-time visualisation, and machine learning to support timely decisions. E.g. Contractual Requirements, Asset Management, Incident Reporting, plus more.
- Our real-time data solution, based on the SIRI protocol, processes raw data in under 1.5 seconds, one of our transport clients uses this to improve client communications, enhancing efficiency in timetables, vehicle monitoring, facilities monitoring and situation exchange. Click [here](#) to listen to MTS explain its impact at AusRAIL 2024.
- Our predictive analytics capability allows us to forecast against business goals e.g. Understand your asset forecasting. Or electricity impacts up to two years in advance with 99% accuracy. Or identify 87% of staff likely to leave within 12 months with 96% accuracy.

## ACCREDITATIONS

- Australian-owned and operated with our head office in Brisbane and subject matter experts all across VIC, NSW, WA and QLD.
- COSOL has been in business for 25 years and is founded by data and tech experts with decades of enterprise experience.
- ISO/IEC 27001:2022 Information Security Management certified by BSI under certificate number IS837459.
